A review of MOUT Instrumentation System (IS) changes for Urban Assault Courses, Shoot Houses and Combined Arms Collective Training Facilities. The USAIS changes to the targetry requirements for the Integrated-Military Operations on Urbanized Terrain Training System (I-MTS) ORD and the corresponding changes to Human Urban Targets (HUTs) will be outlined. A crosswalk of TCs 25-8 and 90-1 to ensure synchronization as projects are designed and implemented will be presented. Lessons learned from the recent construction of Urban Training facilities will be discussed. Open discussion about the future direction of MOUT training and corresponding targetry and instrumentation requirements will be provided to the USAIS and the CAC to facilitate field input to future MOUT training.
